Weld bead grinding machine for outside surfaces

 # 430232195

Floor grinders & Weld bead grinders (off shore) - ROCKET 75

ROCKET 75 was developed in close collaboration with the offshore industry to meet end-user requirements for grinding welding beads on large pipes.

With a total weight of 800/850 kg, the machine features a robust construction designed to ensure maximum stability during continuous operation. Four height-adjustable stabilizing feet provide optimal steadiness throughout the grinding process.

Despite its solid build, the ROCKET 75 remains easy to move using a pallet jack or forklift.

The machine is equipped with a handwheel for precise horizontal adjustment and a pneumatic pressure control system that

SCANTOOL GROUP Industrivej 3-9, 9460 Brovst +45 98 23 60 88 info@scantool-group.dk

maintains consistent pressure at all times. Grinding depth is regulated by an adjustable depth stop positioned at the front of the grinding area.

This combination guarantees efficient and uniform grinding of welding beads while safeguarding the base material.

Product Specification

Grinder Belt (mm)	75x2000
Belt speed (m/sec)	30
Contact wheel (mm)	ø200x75mm
Motor (HP)	7,5
Rpm	2860/3460
Voltage	3x400-440v, 50/60Hz
Weight	800
