CG centerless belt grinder and polishing machine

 # 430232237

CG Centerless grinders - SCANTOOL 75 CGX

Scantool 75 CGX centerless grinding and polishing machines are supplied with an attachment which can be mounted on all belt grinders with a 75x2000 mm belt and with a large grinding surface on top.

The centerless grinding attachment is easy to operate and grinds/polishes all pipes and tubes with diameters of between 6 and 120 mm.

Scantool CGX centerless grinding and polishing machines are unique compared to other centerless grinders on the market because they remain a belt grinder even when the centerless grinding attachment is mounted.

It is not necessary to take off the centerless attachment when using the belt grinder for normal grinding work.

Both the contact wheel and the flat grinding surface on top are available for normal grinding and polishing even with the attachment on the machine.

Centerless belt grinder is available with and without dust extraction.

Standard version - grinding and polishing of tubes with diameters of between 20 and 120 mm and with the optional teflon support from ø6 - 120mm.
